# Assignment:3

## Task:2

**TASK 2: Static Website Hosting**

**1. Enable static website hosting for your S3 bucket.**

**2. Access the static website using the provided endpoint**

Step1: In the S3 bucket dashboard go to the properties tab and upload your static website content.

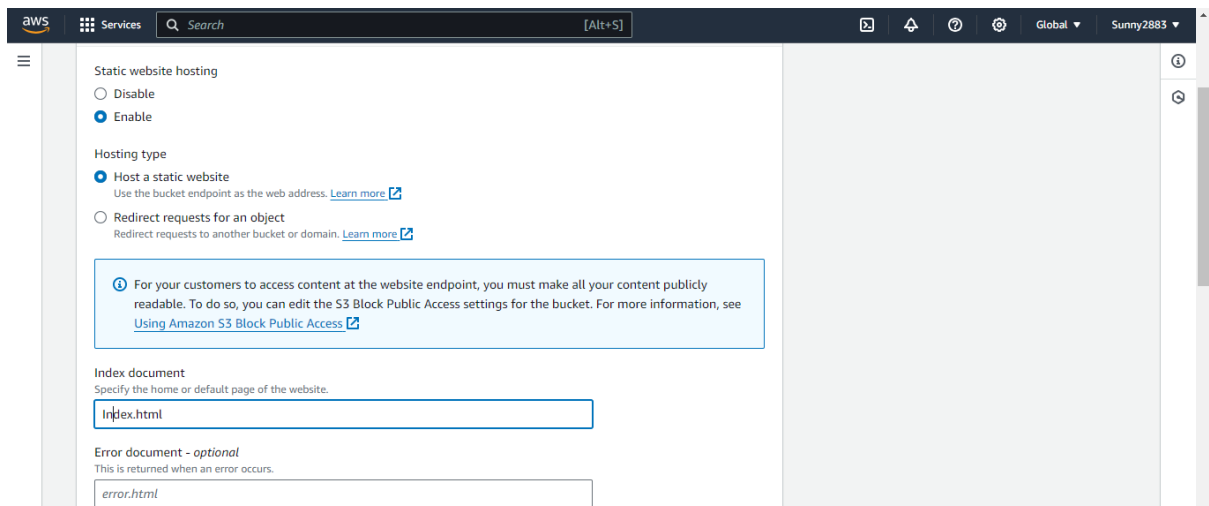

Step2: under the static website hosting click on edit button.

Step3: Enable the static website hosting option.

Step4: Specify the document (e.g.., index.html) and error document if needed and save the changes.

Step5: Enable website hosting URL.

### Requester pays

[Edit]

When enabled, the requester pays for requests and data transfer costs, and anonymous access to this bucket is disabled. Learn more ↗
